SP30AP Audiophile Speaker

Specifications Summary

- 15 Watts nom. power handling @ 4 Ohms, 30 Watts Peak
- Hand-made cherry wood cabinet (black or cherry finish)
- Multi-form cone design for improved vocal clarity
- Driver Frequency range of: 20 Hz to 30 kHz
- Speaker driver/total weight: 1.80 lbs/3.75 lbs
- 18 mm dia. Alu-copper speaker coil
- Inputs: Gold-plated binding posts, 3.5 mm jack
- 7" wide x 5.5" high x 7.25" deep

The SP30AP audiophile features the Alpair 6M Gold speaker driver that is particularly suited for communication uses. The bass-rich warm tone of the driver complements the sound of the human voice. The SP30AP audiophile features the new generation 2 model of the Alpair 6 heritage.

IMPORTANT:

1. For the FIRST 30 HOURS use very low volume. Hours 30 to 100, gradually increase the volume, but remain conservative. From 100 to 300 hours gradually transition into normative use, and if listening to music, include some bass.

2. Always remain conservative, gentle, and sensible when using this speaker and it will continue to yield pleasing acoustic results.

General Care:

Keep the driver away from direct sun-light as the UV will break down the cone structure. Very high humidity could affect the stability of the cone. Don't use any wet cloths or very damp materials to clean the cone. A light gentle brush with a soft duster is sufficient.
